## ORNAMENTAL SHADE

(C) One year rooted cuttings.

(S) Seedlings.

(G) Grafts.

Each (T) indicates one transplanting.

**O**UR Number One rooted cuttings in most cases run at least 12 to 18 inches high; some stronger growing varieties 18 to 24 inches; a few weaker sorts 8 to 12 inches. We grade our cuttings for root system and assure you a heavy well rooted grade.

## EVERGREENS

**O**UR potted evergreens are extra strong, practically all of them having been grown one year in Pots from large cuttings. They have made a splendid bushy top growth and are in fine shape to plant now or as early in the spring as you wish.

Cole's grafted evergreens are so strong that many customers prefer to plant them direct into nursery rows instead of beds.
